

XOY CHORUS 1.0

Lush movement. Analog heart.

XOY CHORUS brings rich stereo depth and nostalgic character to your sound. Inspired by the iconic chorus of vintage gear like the Juno-60, it delivers warmth, shimmer, and evolving motion — from subtle width to lush shoegaze swirls — with just one knob and three expressive modes.

Designed for musicians, not technicians — no menus, no distractions. Just instant chorus inspiration.

How it works

At the core of XOY CHORUS are **three distinct modes**, selected via dedicated mode buttons:

- **MODE I** – A soft and classic chorus. Perfect for synths, clean guitars, pads, and vocals. The "always-on" setting.
- **MODE II** – A more animated variation. Faster modulation and wider movement. Great for thick stereo leads or stacked harmonies.
- **MODE III** – A deeper, dreamlike version. Perfect for ambient textures, drones, and shoegaze guitars.

Use the large **MIX** knob to blend in the effect:

- **0%**: dry signal only
- **100%**: full wet chorus
- The glowing ring around the knob responds dynamically to both **input signal** and **effect level**, providing visual feedback of intensity.

XOY Sound Signature

Even at low mix levels, XOY CHORUS adds a subtle analog touch. The sound always passes through a gentle **analog-style coloration stage**, adding depth and presence reminiscent of classic studio gear and stompboxes.

Whether you're adding sparkle to a pad or diving into swirling modulations, the result is always rich and musical.

Why you'll love it

- Vintage chorus feel — without complexity
- Ideal for synths, guitars, pads, vocals, and bass
- Designed to be left on: subtle at low mix, lush at high
- Gorgeous visual feedback via the glowing ring
- Runs as both plugin and standalone app

Format & Compatibility

XOY CHORUS is available as:

Audio Unit (AU) — Logic Pro, MainStage, etc.

VST3

macOS 12 or newer is recommended.

Windows version is not planned at this time.

Plugin Info

Plugin name in DAW: XOY CHORUS

Developer: XOY Production AB

Version: 1.0.0

License: Free to use in your productions. All rights reserved.

Installation (macOS)

Copy the .component file to:

~/Library/Audio/Plug-Ins/Components

Copy the .vst3 file to:

~/Library/Audio/Plug-Ins/VST3

Restart your DAW.

Look for **XOY CHORUS** in your plugin list under Effects.
