

XOY EQ-III 1.0

Three bands. Infinite tone.

XOY EQ-III brings intuitive and musical tone shaping into your hands, inspired by classic analog studio EQs from the golden age of recording. With just three gain knobs and matching frequency selectors, it lets you sculpt your sound quickly — no numbers, no clutter, just your ears.

Whether you're warming up a bass line, sweetening vocals, or carving space in a mix, EQ-III gives you timeless EQ flow in a modern interface.

How it works

At the heart of XOY EQ-III are three powerful bands:

- **LOW** — Boost or cut with a wide low shelf
- **MID** — A musical bell with fixed Q
- **HIGH** — Boost or cut with a smooth high shelf

Beneath each gain knob is a **frequency selector** knob with clearly labeled positions — no typing, no guesswork. Just dial in what sounds good.

Double-click any gain knob to snap back to 0 dB. A soft detent around zero helps you feel your way.

Frequencies

- **LOW:** 30 / 40 / 80 / 100 Hz
- **MID:** 0.35 / 0.7 / 1.6 / 3.2 / 4.8 / 7.2 kHz
- **HIGH:** 10 / 12 / 15 kHz

XOY Sound Signature

Like all XOY tools, EQ-III includes a subtle analog-style coloration layer under the hood. Even with neutral EQ, your signal gains warmth, clarity, and that elusive “finished” feel reminiscent of vintage hardware.

Why you'll love it

- Vintage EQ behavior — fast and musical
- No numbers — you work with your ears
