

XOY FLANGER 1.0

Shimmering motion. Analog soul.

XOY FLANGER delivers everything from subtle movement to pulsating jet-plane sweeps — with warm analog character and clear presence. Inspired by classic stompbox flangers and studio processors from the '70s and '80s, it can go from gentle modulation to intense peaks, with three expressive modes.

For musicians, not technicians — no menus, no distractions. Just instant flanger inspiration.

How it Works

At the heart of XOY FLANGER are three distinctive modes, selectable via dedicated mode buttons:

- **MODE I** — Slow modulation, low feedback. Smooth and musical — perfect for pads, strings, and atmospheric textures.
- **MODE II** — Medium speed with deeper sweeps. Adds classic '80s character to guitars, synths, and bass.
- **MODE III** — Fast modulation and high feedback. Intense jet-flanger that cuts through the mix — perfect for experimental sounds and breakdown effects.

Use the large **MIX** knob to blend the effect:

- **0%**: Dry signal only
- **100%**: Fully wet flanger
- The purple glow ring around the knob dynamically reacts to both input signal and effect strength, giving a clear visual sense of intensity.

XOY Sound Signature

Even at low mix settings, your signal always passes through **XOY Analog Flavor** — a subtle analog coloration that adds depth and presence, inspired by classic tube and transistor-based studio units.

This is part of the XOY identity and is always there, even when the effect is set to minimum.

Why You'll Love It

- Classic flanger feel without the fuss
- Three musical modes with instant response
- Subtle at low mix, dramatic at high
- Purple glow ring for visual feedback
- Runs as both a plugin and standalone app

Format & Compatibility

XOY FLANGER is available as:

Audio Unit (AU) — Logic Pro, MainStage, etc.
VST3

macOS 12 or newer is recommended.
Windows version is not planned at this time.

Plugin Info

Plugin name in DAW: XOY FLANGER

Developer: XOY Production AB

Version: 1.0.0

License: Free to use in your productions. All rights reserved.

Installation (macOS)

Copy the .component file to:

~/Library/Audio/Plug-Ins/Components

Copy the .vst3 file to:

~/Library/Audio/Plug-Ins/VST3

Restart your DAW.

Look for **XOY FLANGER** in your plugin list under Effects.
