

XOY PHASER 1.0

Sweeping depth. Analog warmth.

XOY PHASER brings the classic swirling motion of vintage phasers into a modern, instant-play format — from smooth movement to deep, resonant sweeps. Inspired by iconic stompboxes and rack units from the '70s and '80s, it delivers a warm, musical phase sound that cuts through without harshness.

Designed for musicians, not menu-divers — no complex controls, no distractions. Just pure phaser tone at your fingertips.

How it Works

At the heart of XOY PHASER are **three carefully tuned modes**, selectable via dedicated mode buttons:

- **MODE I – Soft / Classic**
8 stages, smooth modulation, and subtle resonance. Perfect for pads, strings, electric pianos, and atmospheric textures.
- **MODE II – Wide**
10 stages with extended range and a more pronounced sweep. Adds classic '80s shimmer to guitars, synths, and bass.
- **MODE III – Intense**
12 stages with deep feedback and dramatic movement. Ideal for bold sweeps, experimental sound design, and breakdown effects.

Use the large **MIX knob** to blend the effect:

- **0%:** Dry signal only
- **100%:** Fully wet phaser
- The **purple glow ring** reacts dynamically to the input signal and modulation depth, giving a clear visual sense of intensity.

XOY Sound Signature

Like all XOY effects, the PHASER includes **XOY Analog Flavor** — a subtle, always-on analog coloration inspired by vintage studio hardware. It adds depth, warmth, and presence, even at low mix settings or with the effect bypassed.

Why You'll Love It

- Three musical phaser modes for instant inspiration
- From subtle motion to full, swirling depth
- Classic analog character without the noise floor
- Purple glow ring for visual feedback
- Runs as both plugin and standalone

Format & Compatibility

XOY PHASER is available as:

Audio Unit (AU) — Logic Pro, MainStage, etc.

VST3

macOS 12 or newer is recommended.

Windows version is not planned at this time.

Plugin Info

Plugin name in DAW: XOY PHASER

Developer: XOY Production AB

Version: 1.0.0

License: Free to use in your productions. All rights reserved.

Installation (macOS)

Copy the .component file to:

/Users/YourName/Library/Audio/Plug-Ins/Components

Restart Logic or your DAW.

Look for **XOY SATURATOR** in your plugin list under Effects.
